- French

Strategic Clinical Data Researcher with 4 years of experience in mental health research, focused on collecting and analyzing data for clinical trials aimed at improving therapeutic outcomes. My educational background in psychology and data analysis equips me with a unique perspective on the nuances of mental health data. I have successfully designed data collection instruments that capture relevant psychological metrics and collaborated with healthcare providers to enhance data accuracy.

WORK EXPERIENCE

Clinical Data Specialist   2020-2023

MindCare Solutions

- Developed data collection frameworks tailored to mental health clinical trials, improving data quality.
- Conducted statistical analyses using SPSS, leading to significant findings in treatment efficacy.
- Collaborated with clinical teams to refine study protocols, ensuring compliance with ethical standards.
- Maintained a comprehensive database of trial participants, enhancing data integrity.
- Provided training to research staff on data management practices, fostering a culture of quality.
- Assisted in the preparation of manuscripts for publication, contributing to the field of mental health.

Data Entry Coordinator   2019-2020

Therapy Innovations

- Managed data entry processes for mental health assessments, ensuring accurate documentation.
- Participated in quality assurance checks, achieving a 95% accuracy rate in data entry.
- Collaborated with therapists to align data collection methods with clinical objectives.
- Developed user-friendly data entry forms that improved staff efficiency.
- Assisted in creating reports for clinical review, enhancing stakeholder understanding.
- Supported the implementation of an electronic health record system, streamlining data access.

ACHIEVEMENTS

- Recognized for 'Best Research Project' at MindCare Solutions for innovative data collection methods.
- Contributed to a study published in a leading journal on mental health interventions.
- Improved data entry protocols, resulting in a 20% decrease in turnaround time.
