MPH IN EPIDEMIOLOGY, UNIVERSITY OF CALIFORNIA, BERKELEY

ACHIEVEMENTS

- Recipient of the 'Emerging Leader in Public Health' award.
- Published research in several high-impact journals focusing on maternal health.
- Secured a grant for \$500,000 to study childhood obesity interventions.

PROFILE

Enthusiastic Clinical Epidemiologist with a strong background in maternal and child health. Over 7 years of experience in conducting research on health disparities and evaluating public health programs. Skilled in both qualitative and quantitative research methodologies. Proven ability to analyze complex health data and communicate findings effectively to diverse audiences. Passionate about improving health outcomes for underserved populations through research and advocacy.

EXPERIENCE

EPIDEMIOLOGIST

Health Solutions Agency

2016 - Present

- Conducted a study on maternal health outcomes in low-income communities.
- Analyzed survey data to assess the effectiveness of prenatal care programs.
- Developed partnerships with local organizations to enhance community outreach efforts.
- Prepared reports and presented findings to stakeholders, leading to program improvements.
- Managed a team of research assistants in data collection and analysis.
- Implemented a new data tracking system to improve data accuracy and reporting.

RESEARCH ASSOCIATE

University Health Center

2014 - 2016

- Assisted in research on childhood obesity and its social determinants.
- Conducted focus groups to gather qualitative data from community members.
- Analyzed data using statistical software to identify trends and correlations.
- Supported the development of educational programs aimed at promoting healthy lifestyles.
- Collaborated with faculty on grant applications for research funding.
- Presented findings at local health conferences to raise awareness of the issue.
