Experienced Clinical Epidemiologist with a specialization in health economics and health services research. Over 6 years of experience in evaluating healthcare interventions and analyzing cost-effectiveness. Proficient in statistical modeling and economic evaluation methods. Strong background in conducting systematic reviews and meta-analyses to inform healthcare policy. Skilled in communicating complex data to diverse audiences, including policymakers and healthcare professionals.

💼 WORK EXPERIENCE

Health Economist   2020-2023

Healthcare Research Group

- Conducted cost-effectiveness analyses of new healthcare interventions.
- Developed models to predict healthcare outcomes and expenditures.
- Collaborated with clinicians to evaluate the impact of treatment protocols.
- Presented findings to healthcare administrators to inform policy changes.
- Managed systematic reviews to summarize evidence for health interventions.
- Authored reports that influenced funding decisions for health programs.

Epidemiologist   2019-2020

Public Health Research Center

- Analyzed health data to identify trends in healthcare utilization.
- Conducted evaluations of public health programs to assess effectiveness.
- Worked with stakeholders to develop guidelines based on research findings.
- Presented research at national conferences, enhancing the center's reputation.
- Collaborated with policy experts to advocate for evidence-based healthcare.
- Supported grant applications for research funding in health economics.

★ ACHIEVEMENTS

- Recipient of the 'Excellence in Health Economics' award for innovative research.
- Published multiple articles in high-impact journals that influenced healthcare policy.
- Led initiatives that improved healthcare delivery efficiency by 25%.
