WORK EXPERIENCE

Global Clinical Research Manager 2020-2023

Global Health Initiative

- Oversaw multi-country clinical trials focused on new vaccines for infectious diseases.
- Developed research protocols tailored to local cultural contexts, ensuring ethical compliance.
- Collaborated with local health authorities to facilitate participant recruitment and retention.
- Conducted data analysis and prepared reports for international regulatory bodies.
- Mentored local research teams in best practices for clinical trial management.
- Increased trial participation by 40% through community engagement and outreach efforts.

Clinical Research Associate 2019-2020

Infectious Disease Research Center

- Assisted in the management of clinical trials for new treatments of HIV and malaria.
- Coordinated logistics for trial operations, ensuring compliance with ethical guidelines.
- Engaged with participants to address concerns and enhance trial retention.
- Supported the development of study materials for participant education.
- Analyzed trial data and contributed to regulatory submission documents.
- Enhanced participant satisfaction rates through effective communication strategies.

ACHIEVEMENTS

- Led a clinical trial that resulted in a breakthrough malaria vaccine.
- Published influential research on the impact of infectious diseases in vulnerable populations.
- Received the 'Global Health Advocate' award from the World Health Organization in 2023.
