## EXPERTISE SKILLS

- Cloud-Native Development
- Microservices
- Kubernetes
- Docker
- AWS Lambda
- Agile
- CI/CD
- RESTful APIs

## LANGUAGES

- English
- Spanish
- French

## CERTIFICATION

- Bachelor of Science in Software Engineering, State University, 2015

# MICHAEL ANDERSON

## CLOUD APPLICATION DEVELOPER

Innovative Cloud Computing Engineer with 8 years of experience specializing in cloud-native application development. Passionate about leveraging microservices and containerization technologies to build scalable and efficient applications. Proven success in utilizing Kubernetes and Docker to orchestrate containerized applications, resulting in improved deployment times and system reliability. Strong advocate for Agile methodologies, encouraging collaboration and iterative development to enhance project outcomes.

## PROFESSIONAL EXPERIENCE

### **NextGen Software Ltd.**

*Mar 2018 - Present*

Cloud Application Developer

- Designed and developed cloud-native applications using microservices architecture, enhancing scalability.
- Utilized Kubernetes for orchestration, improving application deployment times by 50%.
- Collaborated with cross-functional teams to redefine project requirements and align on deliverables.
- Implemented CI/CD practices to streamline development and deployment processes.
- Conducted performance testing and optimization for cloud applications, resulting in a 30% increase in efficiency.
- Participated in Agile ceremonies to foster a culture of collaboration and continuous improvement.

### **Innovatech Solutions**

*Dec 2015 - Jan 2018*

Cloud Developer

- Developed scalable and resilient cloud applications using AWS Lambda and serverless architecture.
- Integrated RESTful APIs into applications, enabling seamless data exchange and functionality.
- Worked with DevOps teams to automate deployment processes, reducing time to market.
- Conducted code reviews and provided mentorship to junior developers on best practices.
- Implemented logging and monitoring solutions to track application performance and health.
- Facilitated workshops on cloud development tools and technologies for the engineering team.

## ACHIEVEMENTS

- Successfully launched multiple cloud-native applications with zero downtime during deployment.
- Recognized for leading a project that improved application reliability by 60%.
- Contributed to an internal knowledge base, improving team productivity and efficiency.
