MASTER OF SCIENCE IN CYBERSECURITY, NATIONAL UNIVERSITY

ACHIEVEMENTS

- Reduced security incidents by 40% through proactive monitoring and quick remediation.
- Led a project that improved deployment efficiency by 30% in a regulated environment.
- Awarded 'Best Innovator' for

I am a Cloud DevOps Engineer with over 7 years of experience, primarily focusing on the finance sector. My expertise lies in creating secure and scalable cloud environments that meet stringent regulatory requirements. I have successfully led several high-stakes projects involving the migration of critical financial applications to the cloud, ensuring minimal disruption and maximum efficiency.

WORK EXPERIENCE

CLOUD SECURITY ENGINEER

Finance Solutions Group

2020 - 2025

- Architected secure cloud infrastructures on AWS for financial applications.
- Implemented security controls and compliance checks, ensuring adherence to industry regulations.
- Developed automated scripts using Chef for configuration management and deployment.
- Monitored cloud environments for security vulnerabilities and provided remediation strategies.
- Collaborated with cross-functional teams to integrate security practices into the DevOps pipeline.
- Conducted training on security best practices for cloud environments.

DEVOPS ENGINEER

Banking Innovations LLC

2015 - 2020

- Managed deployment of applications on Azure, ensuring high availability and disaster recovery.
- Developed CI/CD pipelines with Azure DevOps, accelerating release cycles.
- Implemented monitoring solutions using Azure Monitor for proactive issue resolution.
- Collaborated with developers to optimize application performance and scalability.
- Participated in incident response and root cause analysis for production issues.
- Created and maintained documentation for operational procedures and best practices.
