EXPERTISE SKILLS

- Cloud Computing
- Performance Analysis
- AWS
- Google Cloud
- CI/CD
- Troubleshooting

LANGUAGES

- English
- Spanish
- French

CERTIFICATION

- Bachelor of Science in Software Engineering, City University

MICHAEL ANDERSON

CLOUD INFRASTRUCTURE ENGINEER

Dedicated Cloud Performance Engineer with over 5 years of experience in cloud computing and infrastructure management. Demonstrated expertise in enhancing application performance and availability through effective cloud solutions. Strong analytical skills, with a focus on performance metrics, root cause analysis, and troubleshooting. Experienced in various cloud platforms, including AWS and Google Cloud Platform.

PROFESSIONAL EXPERIENCE

Digital Solutions Group

Mar 2018 - Present

Cloud Infrastructure Engineer

- Designed and maintained cloud infrastructure to ensure optimal performance and reliability.
- Conducted performance reviews and implemented changes to improve system efficiency.
- Utilized monitoring tools to track application performance and identify areas for improvement.
- Collaborated with cross-functional teams to enhance deployment processes.
- Managed cloud cost optimization initiatives, reducing expenses by 15%.
- Provided technical support and troubleshooting for cloud-based applications.

Cloud Ventures

Dec 2015 - Jan 2018

Junior Cloud Engineer

- Assisted in the migration of on-premise applications to cloud platforms, enhancing accessibility.
- Monitored cloud resources and provided insights for performance improvements.
- Participated in the implementation of CI/CD pipelines for efficient application releases.
- Supported the development team in optimizing application code for cloud environments.
- Conducted regular performance testing and reported findings to senior engineers.
- Created user documentation for cloud services utilized by clients.

ACHIEVEMENTS

- Reduced system downtime by 40% through proactive performance monitoring.
- Awarded Employee of the Month for outstanding contributions to cloud migration projects.
- Increased application throughput by 25% by optimizing cloud resource allocation.
