

MICHAEL ANDERSON

CLOUD ENGINEER

PROFILE

Results-driven Cloud Platform Administrator with 5 years of hands-on experience in deploying and managing cloud environments. Expertise in Google Cloud Platform (GCP) and Kubernetes, with a focus on automating operations and improving system reliability. Adept at collaborating with development teams to create scalable solutions and streamline processes. Proven track record of optimizing cloud costs and resources through effective monitoring and management strategies.

EXPERIENCE

CLOUD ENGINEER

Innovative Cloud Solutions

2016 - Present

- Deployed and managed scalable applications on Google Cloud, improving response times by 35%.
- Automated system updates and backups using Cloud Functions, reducing manual effort by 60%.
- Collaborated with developers to implement microservices architecture on Kubernetes.
- Conducted performance tuning of cloud applications, enhancing efficiency and user experience.
- Monitored cloud resources and optimized usage, resulting in a 15% reduction in costs.
- Developed documentation for cloud processes and best practices for team members.

JUNIOR CLOUD ADMINISTRATOR

Tech Solutions Inc.

2014 - 2016

- Assisted in the setup and configuration of cloud infrastructure on AWS, contributing to initial deployment phases.
- Supported the migration of on-premises applications to cloud environments, ensuring minimal downtime.
- Monitored system health and performance, escalating issues as needed to senior engineers.
- Participated in the development of cloud security policies and compliance initiatives.
- Provided technical support for cloud-related inquiries from internal teams.
- Helped in maintaining cloud cost management practices to stay within budget.
