SKILLS

- Kubernetes
- Ansible
- AWS
- CI/CD
- Docker
- Agile
- Monitoring
- Security

LANGUAGES

- English
- Spanish
- French

EDUCATION

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY, TECH UNIVERSITY

ACHIEVEMENTS

- Received 'Best Innovator' award for developing an automated cloud provisioning tool.
- Led a project that decreased cloud costs by 20% through resource optimization.
- Presented at a national tech conference on cloud infrastructure best practices.

PROFILE

With over 5 years in cloud engineering, I specialize in designing and deploying cloud infrastructures that enhance operational efficiency. My experience includes working extensively with cloud-native technologies, ensuring that applications are resilient and scalable. I have a strong foundation in DevOps practices, utilizing tools such as Kubernetes and Ansible for orchestration and configuration management.

EXPERIENCE

CLOUD ENGINEER

Cloud Solutions Corp.

2016 - Present

- Designed and implemented cloud solutions for high-traffic applications, improving uptime by 99.95%.
- Automated infrastructure management using Ansible, leading to a 30% reduction in manual errors.
- Collaborated with the development team to integrate CI/CD pipelines, accelerating release cycles.
- Conducted performance tuning and optimization for cloud databases, resulting in a 20% efficiency gain.
- Provided 24/7 support for cloud infrastructure, ensuring rapid resolution of any service disruptions.
- Developed monitoring solutions using CloudWatch, enhancing visibility into system health.

DEVOPS ENGINEER

Tech Forward Enterprises

2014 - 2016

- Implemented container orchestration using Kubernetes, improving deployment consistency across environments.
- Worked closely with development teams to deliver cloud-based applications using Agile methodologies.
- Managed cloud cost optimization strategies, resulting in a 25% reduction in monthly expenses.
- Conducted security assessments for cloud applications, ensuring compliance with industry standards.
- Developed documentation for cloud infrastructure and operational processes.
- Participated in disaster recovery planning and testing, enhancing system resilience.
