EDUCATION

BACHELOR OF SCIENCE IN COMPUTER SCIENCE

ACHIEVEMENTS

- Contributed to a project that improved application load times by 40%.
- Recognized for outstanding support during a major cloud migration project.
- Developed a process that reduced cloud-related incidents by 25%.

PROFILE

Results-driven Cloud Systems Administrator with 5 years of experience in managing and optimizing cloud-based environments. Specialized in Google Cloud Platform (GCP) and container orchestration using Kubernetes. Proven track record of enhancing system performance and reliability through effective monitoring and proactive maintenance. Strong advocate for automation and continuous improvement, leveraging tools such as Ansible and Docker to streamline operations.

EXPERIENCE

CLOUD SYSTEMS ADMINISTRATOR

Digital Services Corp.

2016 - Present

- Managed GCP resources, optimizing costs by 15% through resource allocation and scaling.
- Set up and maintained Kubernetes clusters for containerized applications, improving deployment speed.
- Automated backup and recovery processes, ensuring data integrity and availability.
- Developed monitoring dashboards using Stackdriver to enhance visibility into system performance.
- Collaborated with developers to implement CI/CD pipelines, reducing code release times by 30%.
- Conducted training on cloud technologies and practices for technical staff and stakeholders.

JUNIOR CLOUD ADMINISTRATOR

Innovative Tech Solutions

2014 - 2016

- Assisted in the migration of legacy systems to GCP, contributing to a successful transition.
- Monitored cloud infrastructure performance and reported on key metrics to senior management.
- Implemented security measures, including IAM roles and service accounts, to protect resources.
- Supported troubleshooting efforts, resolving 90% of issues within SLA timelines.
- Participated in team meetings to discuss cloud strategy and operational improvements.
- Created documentation for cloud procedures and best practices, enhancing team knowledge.
