

# Michael ANDERSON

## CNC PLASMA CUTTING OPERATOR

Results-driven CNC Plasma Cutting Operator with a solid foundation in industrial production and machining. Extensive experience in operating CNC machines, particularly plasma cutting systems, with a focus on enhancing operational processes to drive efficiency. Skilled in interpreting engineering drawings and specifications, ensuring that all components meet quality and design requirements. Demonstrates a commitment to safety and quality assurance, consistently exceeding production targets.

### SKILLS

- CNC operation
- plasma cutting
- production efficiency
- quality assurance
- teamwork
- process improvement

### LANGUAGES

- English
- Spanish
- French

### EDUCATION

**DIPLOMA IN INDUSTRIAL  
TECHNOLOGY, COMMUNITY COLLEGE  
OF ENGINEERING**

### ACHIEVEMENTS

- Increased production efficiency by 15% through workflow optimization.
- Received recognition for achieving zero defects in production during 2022.
- Contributed to a team initiative that improved safety compliance across operations.

### WORK EXPERIENCE

#### CNC PLASMA CUTTING OPERATOR

Titan Metal Works

2020 - 2025

- Performed plasma cutting operations on various materials, ensuring precision in all tasks.
- Utilized CNC programming to optimize cutting paths and enhance material usage.
- Maintained detailed production logs and reports for tracking performance metrics.
- Coordinated with quality assurance teams to ensure compliance with industry standards.
- Implemented improvements in workflows to reduce production times.
- Participated in safety audits and complied with all safety regulations.

#### MACHINIST

Forge Masters LLC

2015 - 2020

- Operated various machining tools including lathes and milling machines.
- Assisted in designing and fabricating components for diverse projects.
- Conducted routine inspections to maintain quality control throughout the production process.
- Provided input for process improvements and cost-saving initiatives.
- Worked closely with engineers to translate design specifications into functional products.
- Maintained equipment and tools to ensure optimal performance and safety.
