- Spanish
- French

EDUCATION

BACHELOR OF SCIENCE IN ENVIRONMENTAL RESTORATION, UNIVERSITY OF OREGON, 2014

ACHIEVEMENTS

- Successfully restored a critical watershed area, improving water quality by 40%.
- Received 'Green Innovation Award' for outstanding reforestation efforts in 2021.
- Published a case study on successful community-led reforestation in a peer-reviewed journal.

Proficient Community Forestry Specialist with a unique specialization in reforestation and ecological restoration initiatives. Demonstrates a strong ability to design and implement projects that restore degraded landscapes while involving local communities in the process. Recognized for innovative approaches that integrate scientific research with community knowledge, resulting in enhanced ecological outcomes. Expertise in mobilizing resources and building partnerships that support large-scale reforestation efforts.

WORK EXPERIENCE

REFORESTATION PROJECT LEAD

Restoration Ecology Network

2020 - 2025

- Led large-scale reforestation projects that restored over 1,000 hectares of degraded land.
- Developed community training programs on native species planting techniques.
- Utilized remote sensing technology to assess forest recovery progress.
- Engaged local schools in tree planting initiatives to foster environmental stewardship.
- Secured partnerships with local businesses to fund restoration efforts.
- Measured and reported on ecological outcomes of reforestation initiatives.

ECOLOGICAL RESTORATION INTERN

Nature Conservancy

2015 - 2020

- Assisted in the development of restoration plans for critical habitats.
- Conducted field surveys to monitor biodiversity and ecosystem health.
- Supported community outreach initiatives to raise awareness about restoration benefits.
- Participated in data collection and analysis for project evaluations.
- Collaborated with scientists to ensure the integration of best practices in restoration.
- Contributed to reports detailing project impact and community engagement.
