🎓 EDUCATION

Bachelor of Science in Cybersecurity

University of Safety Sciences
2016-2020

★ SKILLS

- Java
- Python
- Cybersecurity
- Secure Coding
- Vulnerability Assessment
- Incident Response

🔤 LANGUAGES

- English
- Spanish
- French

Dedicated Computer Software Engineer with a strong focus on cybersecurity and software protection. Over 7 years of experience in developing secure applications and conducting security audits. Knowledgeable in various security frameworks and protocols, with expertise in programming languages such as Java and Python. Proven ability to identify vulnerabilities and implement robust security measures.

💼 WORK EXPERIENCE

Cybersecurity Software Engineer   2020-2023

SecureTech Inc.

- Developed secure applications using Java and Python, reducing security incidents by 40%.
- Conducted regular security audits and vulnerability assessments, identifying and mitigating risks.
- Implemented encryption protocols and secure coding practices across all projects.
- Collaborated with IT teams to enhance network security and protect sensitive data.
- Created training materials and conducted workshops on secure coding for development teams.
- Engaged in incident response activities, effectively managing and resolving security breaches.

Software Developer   2019-2020

Tech Defense Corp.

- Assisted in the development of security policies and procedures for software development.
- Worked with teams to integrate security measures into the software development lifecycle.
- Participated in the analysis of security vulnerabilities and development of mitigation strategies.
- Documented security incidents and assisted in the investigation of breaches.
- Provided support for security-related inquiries from stakeholders, ensuring compliance.
- Engaged in continuous learning to stay updated on security threats and solutions.

★ ACHIEVEMENTS

- Achieved a 99% reduction in security breaches through proactive measures.
- Developed a security training program that increased awareness and compliance among developers.
- Recognized as 'Security Champion' for contributions to enhancing software security practices.
