MICHAEL ANDERSON

Cyber Risk Analyst

Dynamic Cyber Risk Analyst with a focus on the manufacturing sector, leveraging over 8 years of experience in cybersecurity risk management. I specialize in analyzing risks associated with operational technology and industrial control systems. My background includes developing risk assessments, implementing security frameworks, and ensuring compliance with industry regulations. I am skilled in collaborating with engineering teams to embed security into the operational processes.

💼 WORK EXPERIENCE

Cyber Risk Analyst
ManufactureSafe Inc.   2020-2023

- Conducted risk assessments on industrial control systems to identify security vulnerabilities.
- Developed security policies and procedures tailored to the manufacturing environment.
- Collaborated with engineering teams to integrate security measures into production processes.
- Utilized risk management frameworks to prioritize and mitigate security risks.
- Provided training to staff on cybersecurity best practices specific to manufacturing.
- Achieved a 35% reduction in security incidents through enhanced risk management practices.

Information Security Analyst
SecureManufacturing Solutions   2019-2020

- Assisted in the development of an information security strategy for manufacturing clients.
- Conducted security audits and assessments to ensure compliance with industry regulations.
- Monitored security incidents and developed incident response plans.
- Collaborated with vendors to implement secure hardware and software solutions.
- Prepared reports on security assessments and recommended improvements to management.
- Awarded 'Best Innovator' for contributions to enhancing security measures.

★ ACHIEVEMENTS

- Successfully implemented security measures that reduced production downtime by 20% due to cyber incidents.
- Recognized for excellence in security management during a major risk assessment project.
- Contributed to achieving ISO 27001 certification for the organization.
