

# Michael ANDERSON

## THREAT INTELLIGENCE ANALYST

Results-driven Cybersecurity Engineer with a specialization in threat intelligence and incident response. Over the past 9 years, I have honed my skills in identifying, analyzing, and mitigating cyber threats in various industries, including healthcare and retail. My analytical mindset enables me to dissect complex security incidents and develop actionable intelligence. I have successfully implemented threat detection systems that enhance organizational response capabilities.

### SKILLS

- Threat Intelligence
- Incident Response
- Data Protection
- Risk Management
- Security Awareness
- Vulnerability Analysis

### LANGUAGES

- English
- Spanish
- French

### EDUCATION

**BACHELOR OF SCIENCE IN  
CYBERSECURITY, UNIVERSITY OF  
SECURITY, 2014**

### ACHIEVEMENTS

- Published research on advanced threat detection methods in industry journals.
- Improved incident response capabilities, reducing the time to resolution by 35%.
- Awarded Cybersecurity Excellence Award for outstanding contributions to security initiatives.

### WORK EXPERIENCE

#### THREAT INTELLIGENCE ANALYST

HealthSecure Systems

2020 - 2025

- Conducted threat analysis to identify potential risks to the healthcare infrastructure.
- Developed and maintained threat intelligence reports for executive leadership.
- Collaborated with cross-functional teams to enhance incident response plans.
- Led threat hunting exercises that reduced incident response time by 30%.
- Created educational materials on emerging threats for staff training.
- Participated in national cybersecurity drills to enhance preparedness.

#### CYBERSECURITY ENGINEER

RetailGuard Corp

2015 - 2020

- Engineered security solutions to protect customer data from breaches.
- Implemented incident response protocols that improved recovery time by 25%.
- Monitored networks for signs of unauthorized access and data exfiltration.
- Provided security training sessions to employees to raise awareness.
- Developed a security metrics dashboard for real-time monitoring.
- Worked with external vendors to ensure security compliance.
