**Bachelor of Science in Cybersecurity**

Tech Institute

2014

## SKILLS

- Penetration Testing
- Risk Management
- Vulnerability Assessment
- Security Architecture
- Ethical Hacking
- Incident Response

## LANGUAGES

- English
- Spanish
- French

Proactive Cybersecurity Engineer with a robust background in penetration testing and security assessments, boasting over 8 years of experience in identifying and mitigating vulnerabilities across diverse environments. My career began with a focus on ethical hacking, where I developed a deep understanding of attack vectors and countermeasures. I excel in evaluating security systems and providing actionable recommendations to improve defenses.

## 💼 WORK EXPERIENCE

### Penetration Tester
2020-2023

CyberGuard Solutions

- Conducted penetration tests to identify vulnerabilities within client systems.
- Prepared detailed reports with actionable recommendations for remediation.
- Collaborated with clients to develop tailored security solutions.
- Designed and executed red team exercises to simulate real-world attacks.
- Trained junior security analysts on ethical hacking techniques.
- Participated in industry conferences to present findings and share knowledge.

### Security Consultant
2019-2020

SecureTech Agency

- Provided expert guidance on security assessments and risk management.
- Developed security policies and procedures for various clients.
- Conducted training workshops for organizations on penetration testing.
- Reviewed and enhanced security architectures for multiple client projects.
- Assisted in incident response planning and execution.
- Maintained relationships with clients to ensure ongoing support and improvements.

## ★ ACHIEVEMENTS

- Recognized for outstanding performance in security assessments by industry peers.
- Trained over 50 professionals in ethical hacking methodologies.
- Contributed to the development of open-source security tools used in the community.
