

MICHAEL ANDERSON

DAIRY HEALTH PROGRAM MANAGER

PROFILE

A dedicated Dairy Animal Health Specialist with over 10 years of experience in dairy farm operations and veterinary care. Proven ability to implement effective health management protocols that enhance animal welfare and productivity. Skilled in utilizing advanced diagnostic tools and technologies to monitor herd health. Strong advocate for sustainable farming practices and animal welfare, with a focus on reducing antibiotic use through preventive health measures.

EXPERIENCE

DAIRY HEALTH PROGRAM MANAGER

FarmWell Consulting

2016 - Present

- Oversaw health programs for multiple dairy farms, ensuring compliance with regulations.
- Developed and delivered training sessions for farm staff on animal care and health monitoring.
- Conducted herd health audits, identifying areas for improvement and implementing solutions.
- Collaborated with nutritionists to formulate diets that support optimal health and productivity.
- Managed veterinary service schedules to ensure timely care for all animals.
- Utilized herd management software to track health data and outcomes.

VETERINARY ASSISTANT

Healthy Herd Vet Clinic

2014 - 2016

- Supported veterinarians in the treatment and care of dairy cattle.
- Assisted in the collection of samples for diagnostic testing.
- Maintained cleanliness and organization of the clinic and equipment.
- Educated clients on best practices for animal health and welfare.
- Participated in outreach programs to promote animal health awareness in the community.
- Monitored animal behavior and reported changes to the veterinary team.
