

# MICHAEL ANDERSON

## PRODUCTION PLANNING MANAGER

### PROFILE

Dynamic Dairy Production Planner with a decade of experience in optimizing dairy supply chains and enhancing production efficiency. Demonstrated proficiency in utilizing advanced planning software and data analytics to forecast production needs and manage inventory levels effectively. Expertise in implementing process improvements that align production capabilities with market demands, resulting in significant cost savings and increased product quality.

### EXPERIENCE

#### PRODUCTION PLANNING MANAGER

##### Pure Dairy Products

2016 - Present

- Oversaw the production planning process for multiple dairy product lines.
- Utilized ERP systems to enhance forecasting accuracy and reduce stockouts.
- Led a team of planners in developing strategic production schedules.
- Identified bottlenecks in production and proposed solutions to mitigate delays.
- Collaborated with marketing to align production with promotional activities.
- Ensured compliance with food safety standards and best practices.

#### DAIRY SUPPLY CHAIN COORDINATOR

##### Farm Fresh Dairy

2014 - 2016

- Coordinated supply chain activities to ensure timely delivery of dairy products.
- Analyzed inventory levels and adjusted production schedules accordingly.
- Worked closely with logistics to optimize transportation routes.
- Developed relationships with suppliers to improve raw material sourcing.
- Implemented tracking systems for real-time inventory visibility.
- Assisted in training new employees on supply chain processes.
