EDUCATION

BACHELOR OF SCIENCE IN ANIMAL SCIENCE, UNIVERSITY OF CALIFORNIA, DAVIS

ACHIEVEMENTS

- Recognized for outstanding service by the local dairy farmers' association in 2021.
- Developed a herd health management guide adopted by several local farms.
- Increased client retention by 30% through enhanced client communication and follow-up services.

PROFILE

Experienced Dairy Veterinarian with a strong background in herd health management and veterinary medicine. For over 8 years, I have specialized in dairy cattle, focusing on improving herd productivity and overall animal welfare. My career began in a veterinary clinic where I provided care for various animals, but I quickly realized my passion for dairy farming.

EXPERIENCE

DAIRY VETERINARIAN

Sunrise Veterinary Clinic

2016 - Present

- Provided comprehensive veterinary care for over 800 dairy cattle, focusing on preventive health measures.
- Implemented a vaccination program that decreased disease incidence by 25% across multiple farms.
- Conducted fertility assessments and managed breeding programs, resulting in a 20% increase in calving rates.
- Utilized ultrasound technology to diagnose reproductive issues, improving treatment accuracy.
- Advised farmers on nutrition management, contributing to a 15% increase in milk yield.
- Collaborated with agricultural extension services to provide educational workshops on best practices.

VETERINARY ASSOCIATE

Countryside Animal Hospital

2014 - 2016

- Assisted in the care of dairy cattle and small ruminants in a mixed veterinary practice.
- Performed routine health checks and developed treatment plans for various ailments.
- Participated in emergency care for large animals, enhancing my ability to handle high-pressure situations.
- Engaged in client education on animal husbandry and nutrition, improving farmer satisfaction.
- Conducted necropsies to determine causes of death, aiding in herd health management.
- Supported research initiatives focused on dairy cattle health and welfare.
