

Michael ANDERSON

LEAD DAIRY VETERINARIAN

Results-driven Dairy Veterinarian with over 7 years of experience in large animal medicine. My expertise lies in dairy herd health, reproductive management, and nutritional counseling. I have worked directly with dairy farmers to implement health programs that improve production efficiency and animal welfare. My career has been dedicated to addressing the challenges faced by dairy producers, including disease management, biosecurity measures, and optimizing reproduction rates.

WORK EXPERIENCE

LEAD DAIRY VETERINARIAN

Riverview Dairy Health Services

2020 - 2025

- Oversaw the health management of over 1,200 dairy cows, implementing best practices for herd health.
- Developed a comprehensive reproductive health program that increased calving rates by 18%.
- Conducted thorough health assessments and established protocols that reduced disease outbreaks.
- Collaborated with feed nutritionists to optimize cow diets, resulting in a 15% increase in milk production.
- Trained and mentored junior veterinarians in advanced diagnostic techniques and treatments.
- Engaged in community outreach to promote animal welfare and sustainable farming practices.

DAIRY VETERINARY TECHNICIAN

Valley View Veterinary Clinic

2015 - 2020

- Assisted veterinarians in the care of dairy cattle, focusing on routine health checks and vaccinations.
- Managed medical records and monitored treatment progress for over 500 dairy cows.
- Conducted educational sessions for farm staff on animal care and biosecurity measures.
- Participated in necropsies to determine causes of death, contributing to herd management strategies.
- Supported emergency care efforts, enhancing my skills in high-stress situations.
- Ensured compliance with state regulations regarding animal welfare and health protocols.
