WORK EXPERIENCE

Network Architect

2020-2023

Health Tech Solutions

- Designed network solutions that improved the performance of electronic health record systems by 30%.
- Implemented secure access protocols, ensuring compliance with HIPAA regulations.
- Collaborated with software developers to optimize network configurations for healthcare applications.
- Developed disaster recovery plans to ensure data integrity during emergencies.
- Conducted regular security assessments to identify and mitigate vulnerabilities in the network.
- Presented network performance reports to senior management, driving strategic initiatives.

Data Center Network Engineer

2019-2020

Care Innovations Inc.

- Managed the network infrastructure for a multi-site healthcare organization, ensuring high availability.
- Implemented monitoring solutions that reduced network downtime by 25%.
- Coordinated with IT teams to enhance security measures for patient data protection.
- Provided training for staff on best practices for network security and performance.
- Documented all network configurations and changes for compliance and operational efficiency.
- Achieved a 99.9% uptime for critical healthcare services.

ACHIEVEMENTS

- Received 'Excellence in Innovation' award for developing a secure network architecture for healthcare applications.
- Successfully implemented network changes that improved patient data access times by 20%.
- Contributed to a team effort that enhanced network security protocols, achieving compliance with industry standards.
