- English
- Spanish
- French

EDUCATION

**MASTER OF SCIENCE IN DENTAL
IMAGING, UNIVERSITY OF DENTAL
INNOVATIONS**

ACHIEVEMENTS

- Patented a new dental imaging device that has been adopted by multiple clinics.
- Received the 'Innovator Award' for contributions to imaging technology advancements.
- Increased research funding by 50% through successful grant applications.

Detail-oriented Dental Radiology Specialist with a robust background in research and development of advanced imaging technologies. With over 9 years of experience in both clinical and research settings, I bring a unique perspective to dental radiology that combines technical expertise with innovative thinking. My work has involved collaborating with dental professionals and engineers to develop state-of-the-art imaging solutions that improve diagnostic accuracy and patient outcomes.

WORK EXPERIENCE

RESEARCH AND DEVELOPMENT RADIOLOGIST

Innovative Dental Imaging Solutions

2020 - 2025

- Conducted research on new imaging technologies, leading to the development of a novel radiographic device.
- Collaborated with cross-functional teams to test and refine imaging equipment, ensuring optimal performance.
- Presented findings at national conferences, enhancing the company's visibility in the dental community.
- Developed training materials for clinical staff on new imaging technologies and protocols.
- Monitored industry trends to identify opportunities for innovation and improvement.
- Improved diagnostic capabilities by 20% through the implementation of advanced imaging techniques.

CLINICAL RADIOLOGY SPECIALIST

Advanced Dental Care Center

2015 - 2020

- Performed complex radiographic procedures using the latest imaging technologies.
- Worked closely with dentists to analyze imaging results and develop effective treatment plans.
- Implemented quality control measures that improved image clarity and accuracy by 25%.
- Trained new hires on radiographic techniques and safety procedures.
- Engaged in continuous education to stay updated on industry advancements.
- Participated in patient consultations to explain imaging processes and findings.
