

MICHAEL ANDERSON

LEAD PERIODONTAL RESEARCHER

PROFILE

I am an accomplished dental researcher with over 8 years of experience specializing in periodontal disease and its treatment methodologies. My background includes extensive clinical research, data analysis, and the development of innovative treatment protocols. I have a strong track record of collaborating with dental clinics and educational institutions to advance research in periodontal therapies.

EXPERIENCE

LEAD PERIODONTAL RESEARCHER

Global Dental Studies

2016 - Present

- Conducted longitudinal studies on the effects of new periodontal treatments on patient health.
- Analyzed data sets using R, resulting in a 25% improvement in treatment protocols.
- Collaborated with a multidisciplinary team to publish groundbreaking research on periodontal regeneration.
- Presented findings at international periodontal conferences, enhancing global awareness of research outcomes.
- Supervised research assistants, fostering a collaborative research environment.
- Developed educational materials for dentists based on research findings.

RESEARCH SCIENTIST

Institute of Dental Research

2014 - 2016

- Designed and executed clinical trials focusing on the relationship between oral hygiene and periodontal disease.
- Utilized advanced imaging techniques to assess periodontal health in study participants.
- Maintained rigorous documentation and compliance with ethical standards in research.
- Analyzed patient data to identify trends in periodontal disease prevalence.
- Co-authored several influential papers in top dental journals.
- Engaged in community outreach to promote awareness of periodontal health.
