

Michael ANDERSON

DENTAL TECHNOLOGY RESEARCHER

With over 7 years of experience as a dental researcher, my focus has been on the intersection of dental technology and patient care. I am dedicated to exploring how emerging technologies can enhance dental treatments and improve patient outcomes. My experience includes conducting research on digital impressions, 3D printing of dental prosthetics, and telemedicine applications in dentistry.

SKILLS

- Dental technology
- Research project management
- Data visualization
- Collaboration
- Technical writing
- Innovation

LANGUAGES

- English
- Spanish
- French

EDUCATION

MASTER OF SCIENCE IN DENTAL TECHNOLOGY, INNOVATIVE UNIVERSITY, 2014

ACHIEVEMENTS

- Developed a telehealth program that improved patient engagement by 40%.
- Recipient of the 'Best Research in Technology' award at the National Dental Innovation Conference.
- Published 6 articles on dental technology advancements in reputable journals.

WORK EXPERIENCE

DENTAL TECHNOLOGY RESEARCHER

Future Dental Innovations

2020 - 2025

- Investigated the effectiveness of digital impressions in enhancing patient comfort and accuracy.
- Collaborated with engineering teams to develop 3D printed dental models for clinical use.
- Analyzed data to assess the impact of telemedicine on patient follow-up rates.
- Presented research findings at technology conferences, showcasing innovative dental solutions.
- Published articles related to dental technology in leading dental journals.
- Trained dental staff on new technologies and their applications in practice.

RESEARCH ANALYST IN DENTAL TECHNOLOGY

Dental Tech Research Institute

2015 - 2020

- Conducted studies on the use of artificial intelligence in diagnostic imaging.
- Collaborated with dental clinics to gather data on technology adoption rates.
- Utilized software tools for data visualization and reporting.
- Assisted in writing grant proposals for funding technology-related research.
- Participated in workshops to disseminate research findings to the dental community.
- Maintained a comprehensive database of research materials and findings.
