EXPERTISE SKILLS

- GitLab CI
- Docker
- Jenkins
- Agile
- Security Auditing
- Secure Coding
- Risk Management
- Incident Response

LANGUAGES

- English
- Spanish
- French

CERTIFICATION

- Bachelor of Science in Software Engineering, City University

Dedicated DevSecOps Engineer with a diverse background in both software development and IT security, accumulating 7 years of experience. Expertise in integrating security practices into agile development processes, ensuring that security is a fundamental consideration throughout the software lifecycle. Proficient in utilizing tools such as GitLab CI, Jenkins, and Docker to enhance security automation and streamline deployment processes.

PROFESSIONAL EXPERIENCE

Innovative Software Solutions   *Mar 2018 - Present*
DevSecOps Engineer

- Integrated security testing into CI/CD pipelines using GitLab CI, reducing vulnerabilities found in production by 45%.
- Developed automated scripts for security compliance checks that saved 20 hours per month.
- Worked with development teams to create secure coding guidelines, improving code quality.
- Conducted regular security audits on applications, leading to a 30% decrease in security-related incidents.
- Collaborated with cross-functional teams to enhance incident response protocols, reducing response time by 25%.
- Participated in security training sessions, increasing team awareness and understanding of security practices.

Tech Forward Ltd.   *Dec 2015 - Jan 2018*
Software Developer

- Designed and developed applications with security in mind, reducing vulnerabilities by implementing security best practices.
- Collaborated with security teams to understand threats and implement appropriate safeguards.
- Engaged in code reviews focusing on security implications, enhancing overall application security.
- Participated in Agile ceremonies, fostering collaboration between teams.
- Created documentation for secure coding practices, guiding future development efforts.
- Assisted in the migration of legacy applications to more secure frameworks.

ACHIEVEMENTS

- Recognized for developing a security framework that improved application security standards.
- Awarded 'Best Team Player' for collaboration with development and security teams.
- Successfully reduced the average time to remediate vulnerabilities by 40%.
