

MICHAEL ANDERSON

Lead DevSecOps Engineer

Dynamic DevSecOps Engineer with over 9 years of experience in software development and security, excelling in creating secure software solutions. Proficient in cloud security, container security, and automation tools that enhance deployment processes. Strong background in both Agile and DevOps methodologies, enabling effective collaboration across teams to secure applications from development to production.

WORK EXPERIENCE

Lead DevSecOps Engineer

2020-2023

Secure Innovations Ltd.

- Architected and implemented a comprehensive security framework that reduced security incidents by 60%.
- Led cross-functional teams in integrating security practices into the software development lifecycle.
- Automated compliance checks using Jenkins, ensuring adherence to security standards.
- Conducted regular training sessions on security best practices for development teams.
- Engaged in threat modeling sessions, identifying potential security risks early in the process.
- Developed incident response strategies that improved recovery time from security breaches by 30%.

DevOps Engineer

2019-2020

Tech Solutions Corp.

- Implemented CI/CD pipelines that ensured secure deployments while reducing release time by 25%.
- Collaborated with security teams to conduct vulnerability assessments and remediation efforts.
- Utilized Docker and Kubernetes to enhance application security and scalability.
- Maintained infrastructure as code practices, improving consistency and security.
- Provided mentorship to junior engineers on best practices for secure coding and deployment.
- Participated in Agile sprints to align development and security goals.

ACHIEVEMENTS

- Successfully led a project that achieved SOC 2 compliance, enhancing customer trust.
- Awarded 'Innovator of the Year' for developing security automation tools.
- Recognized for outstanding contributions to improving operational security processes.
