- San Francisco, CA

SKILLS

- MRI
- Ultrasound
- Patient Interaction
- Process Improvement
- Team Collaboration
- Quality Control

LANGUAGES

- English
- Spanish
- French

EDUCATION

BACHELOR OF SCIENCE IN DIAGNOSTIC IMAGING, CITY UNIVERSITY, 2015

ACHIEVEMENTS

- Presented research on MRI advancements at a national radiology conference.
- Implemented a new patient feedback system that improved service delivery.
- Achieved certification in MRI technology with a focus on patient safety.

PROFILE

Results-driven Diagnostic Radiographer with 5 years of experience in both clinical and research settings. I specialize in MRI and ultrasound imaging, utilizing cutting-edge technology to provide precise diagnostics. My background in healthcare management allows me to streamline processes and enhance operational efficiency in radiology departments. I am passionate about integrating new technologies and best practices into daily operations to improve patient outcomes.

EXPERIENCE

RADIOGRAPHER II

Tech Imaging Center

2016 - Present

- Executed advanced MRI procedures, obtaining high-quality images that improved diagnostic accuracy.
- Reduced patient wait times by implementing a new scheduling system, increasing throughput by 15%.
- Coordinated with interdisciplinary teams to develop imaging protocols for complex cases.
- Conducted training sessions for new staff on MRI safety and operational procedures.
- Performed quality control tests on imaging equipment, ensuring compliance with regulatory standards.
- Provided compassionate care to patients, resulting in positive feedback and high satisfaction scores.

RADIOLOGY TECHNICIAN

Community Health Clinic

2014 - 2016

- Conducted ultrasound exams, accurately capturing images for diagnostic purposes.
- Assured patient comfort and safety during procedures, leading to a 98% patient satisfaction rate.
- Maintained accurate patient records and imaging reports for efficient follow-up and care.
- Collaborated with physicians to interpret ultrasound results, facilitating timely patient management.
- Assisted in the implementation of digital imaging systems, improving accessibility to patient records.
- Participated in community outreach programs promoting awareness of diagnostic imaging services.
