SKILLS

- Data Protection
- HIPAA Compliance
- Forensic Analysis
- Risk Assessment
- AccessData
- FTK

EDUCATION

BACHELOR OF SCIENCE IN HEALTH INFORMATION MANAGEMENT, UNIVERSITY OF HEALTH SCIENCES, 2015

LANGUAGE

- English
- Spanish
- German

ACHIEVEMENTS

- Recognized for excellence in data security initiatives with the 'Healthcare Cybersecurity Award' in 2021.
- Successfully reduced data breach incidents by 30% through the implementation of new security protocols.
- Developed a training program that improved staff understanding of data privacy laws and regulations.

Michael Anderson

DIGITAL FORENSICS ANALYST

Proficient Digital Forensics Analyst with 6 years of experience in the healthcare industry, specializing in data protection and compliance within medical environments. My career began in IT support, where I gained valuable insights into the importance of data integrity and security in healthcare. Transitioning into digital forensics, I have focused on investigating data breaches and ensuring compliance with HIPAA regulations.

EXPERIENCE

DIGITAL FORENSICS ANALYST

HealthSecure Systems

2016 - Present

- Conducted investigations into data breaches, ensuring compliance with HIPAA regulations and safeguarding patient information.
- Utilized AccessData and FTK to analyze compromised systems and recover lost data.
- Developed and implemented data protection and risk assessment protocols to enhance organizational security.
- Trained healthcare staff on digital forensics and data security, improving compliance awareness by 40%.
- Collaborated with legal teams to prepare findings for potential litigation, ensuring accuracy and thoroughness.
- Maintained comprehensive documentation of investigations, supporting transparency and accountability.

IT SUPPORT SPECIALIST

City Hospital

2014 - 2016

- Provided technical support to healthcare staff, helping them understand data security measures and protocols.
- Assisted in the implementation of data protection strategies across the organization.
- Conducted regular audits of systems to identify vulnerabilities and recommend improvements.
- Engaged in training workshops for staff on cybersecurity best practices.
- Maintained up-to-date knowledge of cybersecurity threats affecting the healthcare sector.
- Documented support requests and resolutions, contributing to improved IT service management practices.
