

MICHAEL ANDERSON

Public Health Data Analyst

Proactive Disease Surveillance Specialist with 6 years of experience in health data analysis and epidemiology. I have a strong background in implementing surveillance systems that enhance disease monitoring and reporting efficiency. My expertise lies in using advanced statistical methods to analyze health data, identify trends, and inform public health policies. I have successfully collaborated with healthcare providers and governmental agencies to improve disease surveillance efforts in underserved communities.

WORK EXPERIENCE

Public Health Data Analyst 2020-2023
Health Analytics Corp

- Analyzed health data to identify trends in disease prevalence and inform decision-making.
- Developed dashboards for real-time monitoring of disease outbreaks.
- Collaborated with public health officials on surveillance initiatives to enhance reporting accuracy.
- Conducted training for healthcare providers on data reporting and analysis.
- Prepared comprehensive reports for stakeholders highlighting key findings and recommendations.
- Engaged with community partners to promote data-driven health initiatives.

Epidemiology Intern 2019-2020
State Health Department

- Assisted in the management of state disease surveillance programs.
- Conducted data entry and preliminary analysis for infectious disease outbreaks.
- Participated in field investigations to gather epidemiological data.
- Supported the development of educational materials for community health efforts.
- Maintained databases and ensured data integrity and compliance.
- Presented findings to public health teams to aid in intervention planning.

ACHIEVEMENTS

- Developed a surveillance dashboard that improved outbreak response time by 50%.
- Recognized for excellence in data analysis at Health Analytics Corp.
- Contributed to a statewide initiative that increased vaccination coverage by 15%.
