- English
- Spanish
- German

ACHIEVEMENTS

- Led a project that improved digital resource accessibility for 1,000 students from low-income families.
- Published research that informed policy changes regarding technology use in schools.
- Recognized with the 'Innovative Research Award' for contributions to educational technology.

Michael Anderson

SENIOR EQUITY RESEARCHER

I am a highly motivated Education Equity Researcher with a focus on the intersection of education and technology. Over the past 9 years, I have developed an expertise in evaluating the impact of educational technologies on student equity and access. My career has involved working with innovative educational technology companies and research institutions to investigate how digital tools can support equitable learning environments.

EXPERIENCE

SENIOR EQUITY RESEARCHER

EdTech Innovations

2016 - Present

- Evaluated the impact of digital learning tools on student engagement and equity.
- Collaborated with product development teams to align educational resources with equity goals.
- Conducted user experience research to inform the design of inclusive educational technologies.
- Presented findings to stakeholders to advocate for equitable technology implementation.
- Authored reports that shaped the development of new educational platforms.
- Engaged in outreach initiatives to promote technology use among underserved schools.

RESEARCH FELLOW

Institute for Digital Learning

2014 - 2016

- Conducted research on the effectiveness of online learning programs for diverse student populations.
- Analyzed data to assess the impact of technology on student achievement and retention.
- Collaborated with educational institutions to evaluate technology integration strategies.
- Presented research at conferences, contributing to the dialogue on technology and equity.
- Supported the development of grant proposals to fund innovative research projects.
- Engaged with community organizations to promote awareness of digital learning resources.
