EDUCATION

M.ED. IN INSTRUCTIONAL TECHNOLOGY, CITY UNIVERSITY, 2017

ACHIEVEMENTS

- Improved student engagement rates by 35% through the implementation of new educational technologies.
- Published a research paper on online learning effectiveness in a leading educational journal.
- Received the 'Innovation in Education' award for contributions to technology integration in teaching.

PROFILE

Detail-oriented Education Technology Researcher with 5 years of experience focusing on the integration of technology in higher education. My experience encompasses evaluating educational software and facilitating the development of innovative teaching tools. I have a strong analytical background, which allows me to assess educational outcomes effectively. I am passionate about enhancing learning experiences through technology and have successfully implemented various projects that improved student engagement and satisfaction.

EXPERIENCE

EDUCATION TECHNOLOGY CONSULTANT

Tech for Learning

2016 - Present

- Evaluated educational applications for usability and effectiveness, leading to a 25% increase in technology adoption among faculty.
- Prepared comprehensive reports on software performance metrics for stakeholders.
- Conducted training sessions for faculty on integrating technology into their curricula.
- Collaborated with software developers to enhance product features based on user feedback.
- Facilitated focus groups to gather insights on student needs and preferences regarding technology use.
- Managed project timelines and deliverables to ensure successful implementation of technology initiatives.

RESEARCH ASSISTANT

University of Education

2014 - 2016

- Supported faculty research projects by conducting literature reviews and data collection.
- Analyzed survey data to assess student satisfaction with online learning environments.
- Assisted in the development of an online resource hub for educational technology best practices.
- Collaborated with IT staff to troubleshoot issues related to educational software.
- Presented research findings at university-sponsored workshops to promote technology integration.
- Maintained accurate records of research activities and project milestones.
