## SKILLS

- Regulatory Affairs
- Compliance Management
- Risk Assessment
- Quality Assurance
- Project Leadership
- Process Improvement

## EDUCATION

**MASTER OF SCIENCE IN BIOMEDICAL ENGINEERING, HEALTH UNIVERSITY**

## LANGUAGE

- English
- Spanish
- German

## ACHIEVEMENTS

- Recipient of the 'Innovation in Safety' award for contributions to medical device standards.
- Successfully led a project team that reduced product recalls by 50%.
- Authored multiple compliance guidelines adopted industry-wide.

# Michael Anderson

## PRINCIPAL ELECTRONICS STANDARDS ENGINEER

I am an Electronics Standards Engineer with over 12 years of experience in the medical devices industry. I specialize in developing and enforcing electronic standards that ensure product safety and compliance with regulations such as ISO 13485 and IEC 60601. My extensive background in quality assurance and regulatory affairs has endowed me with the skills necessary to navigate complex compliance landscapes.

## EXPERIENCE

### PRINCIPAL ELECTRONICS STANDARDS ENGINEER

MedTech Innovations

2016 - Present

- Developed and implemented electronic standards for medical devices in compliance with ISO 13485.
- Led cross-functional teams to improve compliance processes and product safety.
- Conducted risk management activities to identify and mitigate potential hazards.
- Collaborated with regulatory agencies to ensure adherence to IEC 60601 standards.
- Streamlined documentation processes, reducing approval times by 40%.
- Presented compliance status reports to executive leadership regularly.

### REGULATORY COMPLIANCE SPECIALIST

Health Electronics Co.

2014 - 2016

- Monitored product compliance with FDA and CE marking requirements.
- Developed training programs to educate staff on regulatory standards.
- Assisted in the preparation of submissions for product approvals.
- Collaborated with engineering teams to address compliance issues proactively.
- Conducted audits and inspections to ensure adherence to quality standards.
- Aided in achieving a 30% reduction in product non-conformances.
