SKILLS

- Cloud Networking
- Virtualization
- Automation
- CI/CD
- Network Monitoring
- Security Protocols

LANGUAGES

- English
- Spanish
- French

EDUCATION

BACHELOR OF SCIENCE IN COMPUTER SCIENCE, UNIVERSITY OF TEXAS, 2016

ACHIEVEMENTS

- Successfully reduced network operational costs by 25% through cloud migration.
- Recognized for outstanding contributions to a high-visibility cloud project.
- Completed professional certification in cloud technologies to enhance skills.

CLOUD NETWORK ENGINEER

Proactive and innovative Enterprise Network Engineer with a focus on cloud networking and virtualization technologies. Over 6 years of experience in transforming traditional network infrastructures into agile and scalable cloud-based systems. Skilled in leveraging virtualization platforms to enhance network performance and reduce operational costs. Strong understanding of hybrid cloud environments and their integration with on-premise solutions.

WORK EXPERIENCE

CLOUD NETWORK ENGINEER
Cloud Solutions Group
2020 - 2025

- Designed and deployed a hybrid cloud network architecture, enhancing scalability.
- Implemented automation tools to streamline network management processes.
- Conducted performance tuning on cloud-based applications, improving response times by 20%.
- Collaborated with development teams to integrate CI/CD pipelines into network operations.
- Managed cloud security protocols, ensuring data integrity and compliance.
- Provided training on cloud networking best practices to technical staff.

NETWORK ENGINEER
TechWave Corp
2015 - 2020

- Supported the migration of on-premise systems to a cloud-based infrastructure.
- Implemented network monitoring solutions to enhance visibility and performance.
- Executed troubleshooting procedures, reducing downtime by 30%.
- Documented network architecture and changes for future reference and compliance.
- Provided technical support for users during the transition to cloud services.
- Participated in team strategy sessions to enhance overall network performance.
