## SKILLS

- Environmental Assessment
- Transportation Planning
- Project Management
- GIS
- Community Engagement
- Regulatory Compliance

## EDUCATION

**MASTER'S IN ENVIRONMENTAL  
ENGINEERING, GEORGIA INSTITUTE OF  
TECHNOLOGY**

## LANGUAGE

- English
- Spanish
- German

## ACHIEVEMENTS

- Received the 'Outstanding Young Professional' award from the American Society of Civil Engineers in 2020.
- Led a project that reduced environmental impacts of a major highway expansion by 35% through innovative design solutions.
- Contributed to a report that influenced state transportation policy regarding environmental compliance.

# Michael Anderson

## TRANSPORTATION ENVIRONMENTAL ANALYST

Detail-oriented Environmental Impact Assessment Specialist with over 7 years of experience in the transportation sector. Expertise in conducting environmental assessments for large transportation projects, including highways and rail systems. Strong analytical skills combined with a solid understanding of environmental regulations and impact mitigation strategies. Committed to promoting environmentally responsible transportation solutions that balance development needs with ecological sustainability.

## EXPERIENCE

### TRANSPORTATION ENVIRONMENTAL ANALYST

Transit Solutions Group

2016 - Present

- Conducted environmental impact assessments for major highway expansions, ensuring compliance with environmental regulations.
- Collaborated with engineering teams to develop sustainable transportation solutions that minimized ecological disruption.
- Prepared detailed reports outlining potential environmental impacts and recommended mitigation measures.
- Engaged with community stakeholders to address concerns and promote project benefits.
- Monitored project construction activities to ensure adherence to environmental standards.
- Facilitated public meetings to communicate assessment findings and gather feedback.

### ENVIRONMENTAL PLANNER

EcoTransport Consulting

2014 - 2016

- Conducted environmental assessments for transportation planning projects, enhancing project feasibility and sustainability.
- Utilized GIS technology to map environmental features and assess potential impacts of transportation projects.
- Developed and implemented mitigation measures for environmental impacts identified in assessments.
- Collaborated with local governments to ensure compliance with environmental regulations.
- Prepared and presented findings to stakeholders, fostering transparency in project planning.
- Provided input on environmental policies affecting transportation projects, influencing local planning decisions.
