SKILLS

- fieldwork
- laboratory techniques
- data analysis
- teamwork
- scientific communication
- outreach

EDUCATION

B.SC. IN BIOLOGY, STATE UNIVERSITY

LANGUAGE

- English
- Spanish
- German

ACHIEVEMENTS

- Presented research at the National Undergraduate Research Conference.
- Received a departmental award for excellence in undergraduate research.
- Contributed to a publication on microbial diversity in extreme environments.

Michael Anderson

EXO BIOLOGY INTERN

As a junior exobiologist with a keen interest in the potential for life on icy moons, I have spent the last 3 years studying extremophiles in polar environments. My work has involved field research, laboratory analysis, and data interpretation, which has provided valuable insights into how life might survive in extreme conditions similar to those found on Europa and Enceladus.

EXPERIENCE

EXO BIOLOGY INTERN

Astrobiology Research Center

2016 - Present

- Assisted in field expeditions to study extremophiles in polar regions.
- Performed laboratory analyses of microbial samples using PCR and sequencing techniques.
- Collaborated with senior researchers to design experiments for future missions.
- Maintained detailed records and documentation of research findings.
- Presented research outcomes to peers and faculty at departmental meetings.
- Participated in outreach programs to promote interest in astrobiology among students.

UNDERGRADUATE RESEARCH ASSISTANT

State University Department of Biology

2014 - 2016

- Supported ongoing research on microbial life in glacier meltwater.
- Conducted data collection and analysis for various environmental studies.
- Contributed to the preparation of research reports and presentations.
- Assisted in the maintenance of laboratory equipment and supplies.
- Engaged in community outreach initiatives to promote environmental awareness.
- Participated in student-led workshops on scientific inquiry and research methods.
