MICHAEL ANDERSON

FACILITIES ENGINEERING MANAGER

Results-driven Facilities Engineer with over 10 years of experience in the manufacturing sector. Expertise in managing facility operations, implementing lean manufacturing principles, and improving safety protocols. Skilled in conducting risk assessments and developing mitigation plans to enhance operational safety and efficiency. Strong background in collaborating with cross-functional teams to drive process improvements and ensure compliance with industry standards.

PROFESSIONAL EXPERIENCE

Precision Manufacturing Inc.

Mar 2018 - Present

Facilities Engineering Manager

- Led a team of engineers to streamline facility operations, resulting in a 20% increase in productivity.
- Implemented safety training programs that reduced workplace incidents by 30%.
- Managed facility upgrades that improved energy efficiency and reduced costs by 25%.
- Conducted regular risk assessments to identify potential hazards and implement corrective actions.
- Collaborated with production teams to align facility capabilities with manufacturing goals.
- Developed and maintained comprehensive facility documentation and compliance records.

ABC Manufacturing Co.

Dec 2015 - Jan 2018

Facilities Engineer

- Designed and implemented a preventive maintenance schedule that extended equipment lifespan by 15%.
- Utilized CAD software for layout design, improving workflow efficiency in the facility.
- Participated in cross-functional teams to enhance production line safety and efficiency.
- Monitored utility consumption and identified opportunities for cost savings.
- Coordinated facility inspections to ensure compliance with OSHA regulations.
- Provided technical support for troubleshooting facility-related issues.

ACHIEVEMENTS

- Achieved a significant reduction in operational costs through process improvements at Precision Manufacturing Inc.
- Recognized with the Safety Excellence Award for outstanding performance in workplace safety.
- Successfully led an initiative that resulted in a 15% increase in equipment reliability.
