- michael.anderson@email.com

Dynamic Farm Animal Care Specialist with specialized expertise in aquaculture and fish health management. Over 7 years of experience in maintaining aquatic animal welfare and optimizing production in commercial fish farming settings. Demonstrated ability to implement health monitoring programs and biosecurity measures that ensure compliance with industry standards. Strong analytical and problem-solving skills contribute to effective management of aquatic systems and resources.

## WORK EXPERIENCE

### Aquaculture Manager | Ocean Harvest Farms

Jan 2022 – Present

- Managed a commercial fish farm, ensuring optimal health of over 50,000 fish.
- Implemented biosecurity protocols that reduced disease outbreaks by 60%.
- Developed feeding programs that improved growth rates by 25%.
- Conducted regular health assessments and water quality tests.
- Trained staff on best practices for fish handling and care.
- Collaborated with researchers to implement sustainable farming practices.

### Fish Health Technician | Blue Waters Aquaculture

Jul 2019 – Dec 2021

- Assisted in the health management of fish populations in a 10-acre aquaculture facility.
- Monitored fish health and provided treatments as needed.
- Maintained accurate records of health assessments and treatments.
- Participated in feeding and growth monitoring activities.
- Educated staff on fish health management and biosecurity.
- Supported community outreach initiatives to promote aquaculture education.
