SKILLS

- Hatchery Management
- Fish Breeding
- Biosecurity
- Staff Training
- Data Management
- Community Outreach

LANGUAGES

- English
- Spanish
- French

EDUCATION

**BACHELOR OF SCIENCE IN FISHERIES
BIOLOGY, NATIONAL UNIVERSITY, 2017**

ACHIEVEMENTS

- Increased hatchery production by 40% through improved management techniques.
- Recognized for contributions to local fish conservation initiatives.
- Developed educational materials for community workshops on fish sustainability.

WORK EXPERIENCE

HATCHERY MANAGER

Blue Waters Hatchery

2020 - 2025

- Oversaw daily hatchery operations and staff management.
- Implemented breeding programs that enhanced stock survival rates.
- Developed biosecurity protocols to minimize disease risks.
- Trained staff on hatchery techniques and fish health monitoring.
- Collaborated with conservation organizations on breeding initiatives.
- Maintained detailed records of hatchery production and stock assessments.

AQUATIC TECHNICIAN

River Restoration Project

2015 - 2020

- Assisted in aquatic ecosystem restoration and fish stocking efforts.
- Monitored water quality and habitat conditions for fish populations.
- Participated in community workshops to promote sustainable practices.
- Collected data on fish populations for research purposes.
- Supported outreach programs to educate local communities on fish conservation.
- Collaborated with biologists on research projects related to fish health.
