MICHAEL ANDERSON

FISH HEALTH TECHNICIAN

A dedicated Fish Disease Control Specialist with over 8 years of hands-on experience in the management of fish health in aquaculture settings. Skilled in the implementation of disease prevention and control measures, utilizing both traditional and innovative approaches to ensure optimal fish welfare. Strong background in laboratory diagnostics and field research, with a focus on improving production outcomes through effective health management strategies.

PROFESSIONAL EXPERIENCE

Freshwater Aquaculture Corp.

Mar 2018 - Present

Fish Health Technician

- Monitored fish health and implemented disease prevention protocols.
- Assisted in laboratory diagnostics including parasitology and bacteriology.
- Conducted routine health assessments and reported findings to management.
- Participated in the development of treatment plans for infected populations.
- Trained staff on fish handling and biosecurity measures.
- Maintained accurate records of fish health and treatment outcomes.

University Aquaculture Research Center

Dec 2015 - Jan 2018

Aquaculture Research Assistant

- Supported research projects on fish disease resistance and environmental stressors.
- Collected and analyzed data on fish health metrics.
- Assisted in laboratory experiments and field trials.
- Prepared reports and presentations on research findings.
- Collaborated with faculty on grant proposals for aquatic health research.
- Engaged in community outreach to promote fish health awareness.

ACHIEVEMENTS

- Contributed to a research publication on fish disease management practices.
- Implemented a new health monitoring system that improved early detection of outbreaks.
- Recognized for excellence in research assistance during undergraduate studies.
