EDUCATION

**M.SC. IN MARINE CONSERVATION,
UNIVERSITY OF CALIFORNIA, SANTA
BARBARA**

ACHIEVEMENTS

- Contributed to the successful implementation of a marine protected area.
- Published influential policy briefs that shaped conservation efforts.
- Recognized by peers for excellence in marine research and advocacy.

A results-oriented Fisheries Scientist with a background in marine conservation and policy advocacy, bringing over 8 years of experience in research, analysis, and stakeholder engagement within the fisheries sector. Expertise in developing and implementing conservation strategies aimed at protecting marine biodiversity and promoting sustainable fishing practices. Demonstrated ability to analyze complex ecological data, assess the impacts of fishing activities, and advocate for science-based policy changes.

WORK EXPERIENCE

MARINE CONSERVATION SPECIALIST

Marine Policy Institute

2020 - 2025

- Conducted policy analysis to inform conservation strategies.
- Collaborated with stakeholders to develop sustainable fishing guidelines.
- Analyzed marine biodiversity data to assess ecological health.
- Facilitated workshops and seminars on marine conservation.
- Authored reports and policy briefs for governmental agencies.
- Engaged with the public to raise awareness about marine issues.

RESEARCH ANALYST

Ocean Conservation Society

2015 - 2020

- Analyzed data on fish populations and habitat conditions.
- Participated in field surveys to collect ecological data.
- Assisted in the development of marine conservation policies.
- Collaborated with researchers on conservation projects.
- Presented findings to stakeholders and policymakers.
- Contributed to grant proposals to secure funding for research.
