

MICHAEL ANDERSON

AQUACULTURE SPECIALIST

PROFILE

An accomplished Fisheries Technologist with a specialization in aquaculture and sustainable fish farming practices. Over 8 years of experience in designing and implementing aquaculture systems that prioritize environmental sustainability and economic viability. Expertise in water quality management, fish health monitoring, and feed optimization techniques. Strong background in regulatory compliance and best practices in aquaculture operations.

EXPERIENCE

AQUACULTURE SPECIALIST

Sustainable Aquaculture Solutions

2016 - Present

- Designed and optimized recirculating aquaculture systems for various species.
- Monitored water quality parameters to ensure optimal fish health.
- Implemented biosecurity measures to prevent disease outbreaks.
- Collaborated with farmers to enhance feed formulations for growth efficiency.
- Conducted workshops on sustainable aquaculture practices for stakeholders.
- Managed projects to expand aquaculture operations in underutilized areas.

AQUACULTURE TECHNICIAN

Freshwater Fish Farms

2014 - 2016

- Assisted in the daily operations of fish farming facilities.
- Conducted health assessments and treatments for farmed fish.
- Monitored environmental conditions to ensure compliance with regulations.
- Supported the development of feeding schedules based on growth stages.
- Documented production data for performance analysis.
- Engaged with local communities to promote aquaculture benefits.
