

Michael ANDERSON

MARINE FISH HEALTH BIOLOGIST

A results-oriented Fishery Biologist with a focus on marine ecosystems and over 5 years of experience in fish health monitoring and disease management. Proven expertise in assessing the health of fish populations and implementing strategies to mitigate the impact of diseases on aquatic life. Skilled in laboratory techniques, including histopathology and microbiological analysis, with a strong emphasis on data-driven decision making.

SKILLS

- Fish health monitoring
- Disease management
- Laboratory techniques
- Data analysis
- Community outreach
- Research collaboration

LANGUAGES

- English
- Spanish
- French

EDUCATION

**M.SC. IN MARINE BIOLOGY,
UNIVERSITY OF RHODE ISLAND**

ACHIEVEMENTS

- Developed a disease management protocol adopted by local fisheries.
- Published a study on the impact of pollutants on fish health.
- Recognized for contributions to fish health education in 2022.

WORK EXPERIENCE

MARINE FISH HEALTH BIOLOGIST

Institute of Marine Research

2020 - 2025

- Conducted health assessments of marine fish populations.
- Analyzed disease outbreaks and developed management strategies.
- Collaborated with researchers on epidemiological studies.
- Utilized laboratory techniques for fish health diagnostics.
- Presented findings at national scientific conferences.
- Engaged in outreach efforts to educate stakeholders on fish health.

AQUATIC HEALTH RESEARCH ASSISTANT

Coastal Fisheries Center

2015 - 2020

- Assisted in laboratory analyses of fish health metrics.
- Monitored environmental conditions affecting fish populations.
- Participated in field studies to assess fish health.
- Contributed to the development of fish health management plans.
- Co-authored technical reports on disease management.
- Engaged with local communities in health education programs.
