- French

EDUCATION

**M.SC. IN ENVIRONMENTAL SCIENCE,
UNIVERSITY OF FLORIDA, 2009**

ACHIEVEMENTS

- Successfully restored over 100 acres of critical fish habitat.
- Recognized by the Environmental Protection Agency for contributions to aquatic resource management.
- Secured a \$500,000 grant for a multi-year conservation project.

PROFILE

Dedicated Fishery Conservation Scientist with a robust background in aquatic resource management and a focus on biodiversity conservation. Over 12 years of experience in field research and stakeholder collaboration, with a proven track record of developing innovative solutions to complex environmental challenges. Expertise in fishery assessment techniques and habitat restoration projects.

EXPERIENCE

AQUATIC RESOURCE MANAGER

Global Fisheries Initiative

2016 - Present

- Managed projects aimed at restoring fish habitats across multiple regions.
- Conducted comprehensive fishery assessments to inform management decisions.
- Collaborated with local communities to implement sustainable fishing practices.
- Monitored compliance with environmental regulations and best practices.
- Utilized data analysis tools to evaluate project outcomes and effectiveness.
- Facilitated training sessions for stakeholders on resource management techniques.

FIELD RESEARCH SCIENTIST

Aquatic Conservation Network

2014 - 2016

- Conducted field studies to assess the impact of pollution on fish populations.
- Collected and analyzed water quality data to identify pollution sources.
- Worked with environmental agencies to develop remediation strategies.
- Engaged in public outreach to raise awareness about conservation issues.
- Published findings in collaborative research reports.
- Developed educational materials for schools and community groups.
