EDUCATION

B.Sc. in Aquatic Ecology

University of Wisconsin

2017

SKILLS

- Aquatic ecology
- Resource management
- Community engagement
- Research methodology
- Data analysis
- Public outreach

LANGUAGES

- English
- Spanish
- French

Experienced Fishery Conservation Scientist with a strong foundation in aquatic ecology and resource management. Over 5 years of experience in conducting research and implementing conservation projects focused on freshwater ecosystems. Skilled in using ecological assessment tools and methodologies to inform management decisions. Proven ability to work collaboratively with governmental and non-governmental organizations to promote conservation initiatives.

💼 WORK EXPERIENCE

Freshwater Conservation Specialist   2020-2023

Freshwater Trust

- Conducted assessments of freshwater ecosystems to evaluate health and biodiversity.
- Collaborated with local governments on conservation planning.
- Developed outreach materials to educate communities on freshwater issues.
- Utilized ecological tools to monitor fish populations and habitat conditions.
- Engaged with stakeholders to foster community involvement in conservation efforts.
- Presented findings at community forums to raise awareness.

Research Intern   2019-2020

Aquatic Research Center

- Assisted in research projects focused on freshwater fish species.
- Collected and analyzed data on fish behavior and habitat use.
- Contributed to the writing of research reports and publications.
- Participated in community outreach initiatives to promote conservation.
- Supported grant writing efforts for research funding.
- Engaged with local organizations to enhance collaborative efforts.

★ ACHIEVEMENTS

- Developed a community conservation program that engaged over 200 participants.
- Published research on freshwater ecosystems in a regional journal.
- Received recognition for innovative outreach efforts in local media.
