SKILLS

- disease management
- diagnostic tools
- community outreach
- research analysis
- project coordination
- molecular techniques

LANGUAGES

- English
- Spanish
- French

EDUCATION

**MASTER OF SCIENCE IN
ENVIRONMENTAL BIOLOGY,
UNIVERSITY OF OREGON, 2017**

ACHIEVEMENTS

- Successfully led a project that enhanced disease monitoring protocols, resulting in a 25% increase in detection rates.
- Awarded the Excellence in Conservation Award for innovative practices in 2021.
- Published a series of articles on forest disease management in reputable journals.

Innovative Forest Disease Control Specialist with extensive experience in implementing disease management programs across diverse forest ecosystems. Expertise in utilizing advanced diagnostic tools and methodologies to identify and mitigate forest diseases effectively. Strong background in research and analysis, enabling the formulation of evidence-based strategies for disease control. Adept at fostering partnerships with governmental bodies and conservation organizations to promote sustainable forestry practices.

WORK EXPERIENCE

FOREST HEALTH COORDINATOR

Wildlife Conservation Society

2020 - 2025

- Coordinated forest health monitoring programs across multiple regions.
- Implemented disease control initiatives leading to a 35% decrease in tree mortality.
- Utilized molecular techniques for pathogen identification.
- Engaged with local communities to promote forest stewardship.
- Managed interdisciplinary teams for project execution.
- Conducted workshops on disease prevention strategies for stakeholders.

FOREST DISEASE RESEARCH ASSISTANT

University Research Center

2015 - 2020

- Assisted in research projects focused on forest disease ecology.
- Collected and analyzed data on disease spread and impact.
- Contributed to the publication of research findings in scientific journals.
- Supported grant writing efforts for forest health projects.
- Facilitated educational presentations for academic audiences.
- Maintained laboratory equipment and ensured compliance with safety standards.
