

MICHAEL ANDERSON

LEAD SEEDLING PRODUCTION TECHNICIAN

PROFILE

A highly skilled Forest Nursery Specialist with a robust background in ecological restoration and plant propagation. Experience spans over 8 years in managing nursery operations focused on the production of high-quality seedlings for forestry and conservation projects. Proficient in applying advanced horticultural practices and technologies to enhance plant health and growth rates.

EXPERIENCE

LEAD SEEDLING PRODUCTION TECHNICIAN

Forest Revival Nursery

2016 - Present

- Managed seedling production for over 300 species, ensuring high germination rates and quality.
- Utilized data analysis to optimize irrigation schedules based on weather patterns.
- Supervised a team of 10, fostering a collaborative work environment.
- Developed and implemented a comprehensive quality assurance program for seedlings.
- Conducted regular training sessions on best practices for plant care.
- Collaborated with research institutions to evaluate new propagation techniques.

JUNIOR NURSERY TECHNICIAN

Nature's Haven

2014 - 2016

- Assisted in the propagation and care of over 150,000 seedlings annually.
- Helped implement organic pest control measures, resulting in improved plant health.
- Contributed to the design of nursery layouts to enhance operational efficiency.
- Monitored environmental conditions and adjusted care protocols as needed.
- Participated in community outreach programs to educate the public on forest conservation.
- Maintained accurate records of plant growth and nursery operations.
