SKILLS

- Agroforestry
- Land restoration
- Community engagement
- Sustainable agriculture
- Research analysis
- Soil health

LANGUAGES

- English
- Spanish
- French

EDUCATION

BACHELOR OF SCIENCE IN AGROECOLOGY, UNIVERSITY OF FLORIDA, 2014

ACHIEVEMENTS

- Increased farmer adoption of agroforestry practices by 30% through outreach.
- Presented findings at international conferences on agroecological practices.
- Received recognition for outstanding contributions to sustainable land use.

Innovative Forestry Specialist with a specialization in agroforestry and land restoration. Extensive experience in designing and implementing agroforestry systems that enhance land productivity while promoting ecological balance. Demonstrated success in collaborating with farmers and landowners to adopt sustainable practices that improve soil health and increase biodiversity. Proficient in utilizing participatory approaches to engage communities in land management decisions.

WORK EXPERIENCE

AGROFORESTRY SPECIALIST

Sustainable Land Use Institute

2020 - 2025

- Designed agroforestry systems that improved soil fertility and crop yields.
- Collaborated with local farmers to implement sustainable land management practices.
- Conducted training sessions on agroecological techniques and benefits.
- Utilized participatory approaches to engage communities in land restoration.
- Monitored and evaluated the impact of agroforestry projects on biodiversity.
- Authored educational materials on the benefits of agroforestry.

RESEARCH ASSISTANT

Institute for Ecological Agriculture

2015 - 2020

- Conducted field research on the impact of agroforestry on soil health.
- Analyzed data to assess the ecological benefits of integrated farming systems.
- Collaborated with researchers to publish findings in academic journals.
- Participated in community workshops to promote sustainable practices.
- Assisted in developing funding proposals for agroforestry projects.
- Engaged with stakeholders to discuss research implications for policy.
