

MICHAEL ANDERSON

Intern Foundation Engineer

- San Francisco, CA
- (555) 234-5678
- michael.anderson@email.com

As an aspiring Foundation Engineer with a Bachelor's degree in Civil Engineering, I am eager to apply my academic knowledge and internship experiences to real-world projects. My educational background has provided me with a strong foundation in engineering principles, including structural analysis, soil mechanics, and construction management.

WORK EXPERIENCE

Intern Foundation Engineer | Future Builders Inc.

Jan 2022 – Present

- Assisted in foundation design calculations for residential projects
- Conducted soil testing and analysis to inform engineering decisions
- Collaborated with engineers to develop technical documentation
- Participated in site visits to monitor construction processes
- Utilized AutoCAD for drafting and design support
- Received positive feedback for proactive approach and teamwork

Project Intern | Engineering Solutions Group

Jul 2019 – Dec 2021

- Supported project teams in site assessments and data collection
- Assisted in preparing reports and presentations for stakeholders
- Conducted research on current industry practices and technologies
- Gained experience in project management tools and software
- Participated in team meetings to discuss project progress and challenges
- Recognized for enthusiasm and willingness to learn

SKILLS

Foundation design

Soil mechanics

AutoCAD

Project support

Team collaboration

Research

EDUCATION

Bachelor of Science in Civil Engineering

2021

National University

ACHIEVEMENTS

- Completed a capstone project that received top honors in class
- Participated in a student-led sustainability initiative that reduced waste
- Contributed to a research project that was presented at an engineering conference
