### PROFILE

Results-driven Full Stack Developer with a solid background in software development and project management. With over 5 years of experience in creating innovative web applications, I have developed a keen eye for detail and a passion for problem-solving. My expertise spans across various programming languages and frameworks, allowing me to adapt quickly to new technologies and methodologies.

### EXPERIENCE

#### FULL STACK DEVELOPER

##### Creative Tech Agency

*2016 - Present*

- Developed and maintained a high-traffic web application using Vue.js and Express, achieving a 20% increase in user retention.
- Collaborated with designers to create engaging user interfaces that improved customer feedback ratings by 35%.
- Implemented database solutions using MongoDB, optimizing data storage and retrieval processes.
- Participated in code reviews to ensure code quality and adherence to best practices.
- Worked with stakeholders to gather requirements and translate them into technical specifications.
- Designed and executed automated tests, reducing bugs in production by 40%.

#### JUNIOR FULL STACK DEVELOPER

##### NextGen Software Solutions

*2014 - 2016*

- Assisted in the development of a cloud-based application using PHP and Bootstrap, enhancing scalability.
- Maintained existing web applications, performing upgrades and bug fixes as needed.
- Contributed to the development of REST APIs to facilitate communication between front-end and back-end systems.
- Engaged in daily scrums and contributed to sprint retrospectives to improve team processes.
- Conducted user acceptance testing to ensure applications met client requirements.
- Created user manuals and technical documentation for end-user training.
