WORK EXPERIENCE

EMERGENCY CARE PHYSICIAN

Rapid Response Medical Center

2020 - 2025

- Managed up to 50 patients daily in a busy emergency department, ensuring timely and effective care.
- Performed diagnostic procedures and urgent treatments, improving patient recovery times.
- Utilized advanced imaging technologies to assess and diagnose conditions quickly.
- Trained new staff on emergency protocols and best practices.
- Streamlined patient flow processes, resulting in a 30% reduction in wait times.
- Collaborated with specialists for complex cases requiring multidisciplinary care approaches.

GENERAL PRACTICE RESIDENT

Downtown Hospital

2015 - 2020

- Conducted patient evaluations and developed treatment plans as part of residency training.
- Participated in emergency response drills, enhancing readiness for critical situations.
- Engaged in interdisciplinary team meetings to discuss patient care strategies.
- Contributed to quality improvement projects aimed at reducing readmission rates.
- Provided health education to patients and families on disease prevention.
- Assisted in research on emergency care practices leading to improved protocols.
